About

Dedicated computer science professional with a strong foundation in software development and problem-solving. Proficient in multiple programming languages including Python, Java, C, and C++, with hands-on experience in creating Android and web applications. Demonstrated expertise in developing and managing databases using MongoDB and building backend services with Express. Committed to continuous learning and applying innovative solutions to drive technology advancements.

Projects

- **Chatt Application** > A chat application in Android Studio using Java and XML involves creating an intuitive user interface with XML for sending and receiving messages.
- **EnemyKill Game** > An enemy kill game in Android Studio using Java and XML features a dynamic UI designed with XML, where players engage in gameplay to eliminate enemies.
- **CRUD Website** > A CRUD app using React.js and MongoDB features a dynamic front-end built with React.js for creating, reading, updating, and deleting data.
- **Social Media Website** > A social media UI using React.js delivers a responsive and interactive user experience, featuring components for posts, comments, likes, and user profiles.
- **Music Player Application** > Music player in Android Studio using Java and XML offers a user-friendly interface for browsing and playing music tracks. Java handles audio playback, file management, and controls, while XML designs the visual layout and user interactions.
- **Road Safety Application** > A road safety application in Android Studio using Java and XML provides features like real-time alerts and safety tips, leveraging XML for the interface and Java for functionality.
